rotaller to be fair with the publ James S. Alexander, president of the National Bank of Commerce, analyzed the price reduction situation yesterday, adding his estimate of the situation to statements that have been made by Henr. P. Davison of J. P. Mergan & Co., and by Vice-President Frank if. Sisson of the Guaranty Trust Company. Mr. Alexander concludes that it is a time for steadiness but not for alarm."

I feel that we are definitely running into the inevitable and desirable period of readjustment away from the unproduced by the war and its aftermath. This readjustment will be drastic to ome respects but it will bring us to a more safe, stable and satisfact tives and local officials have brong it an conservative use of our credit resources improvement in the transportation stue- and a careful realignment of the various elements in our whole business life

"It will not be sufficient merely to force down prices in the retail markets. commission of the American Association. There must be at the same time an in-indicate that the number of "out of crease of production in the primary markets. This action must be met by a same degree of temperance in consumption or from the reak of 236,000 on April 15 to the part of the public if lower price near Pittsburg a one, and the total un-delivered steel in transport is placed at 2,600,000 tons. from the peak of 236,000 on April 15 to the part of the public if lower price approximately 190,000. This means that a considerable portion of the congection tital volume of production and no feastical volume of production and no feasthis scale of prices could correct the situation if excessive extravagance in buying and in consumption such as we have had since the armistice were to continue. Such extravagance could not fail to produce scarcity, and scarcity could not fall to produce high prices.

"High prices in turn are productive of inflation, both because of the increased amount of capital required to do bustness on high price levels and by the mcreased volume of commodity speculi tion they produce. Fortunately there are unmistakable signs of increasing mod eration on the part of the people.
"Finally, all of these corrective mea-

would fail unless our transportation ystem can be brought back to an callcient condition. It is useless to produc About Sugar Prices.

If we can't transport, Mr. Alexander continued. "This requires the stability than of the general labor situation. If investigating current high costs Deputy mind and followed we can weather with-Attorney-General Samuel A. Berger announced yesterday.

Having been Food Administrator, and according to Mr. Herger 'more familiar out of the needed correction of the with the sugar situation than any other man in this country.' Mr. Hoever is to be interrogated particularly in regard to the supply and the cost of that reto the supply and the cost of that m- finacial leaders to keep their heads and follow the obviously wise course of action Other leaders in other lines, especially could produce serious consequences economists and labor men, are to be under present conditions.
